

## **Supplemental Material**

### **Statement on the Use of Generative Artificial Intelligence**

#### **1. Disclosure**

This statement is provided in accordance with the APA Journals policy on generative AI (American Psychological Association, 2023/2025) and the accompanying Additional Guidance (last updated August 2025). Generative AI (Claude; Anthropic, 2026) was used during the preparation of this manuscript for the following purposes: (a) reviewing the consistency between the R analysis script and the manuscript text; (b) suggesting corrections to the analysis code; and (c) language editing of individual passages, which were subsequently revised by the authors. No confidential material, participant data, or unpublished data of third parties were entered into the tool.

#### **2. Responsibility**

All model specifications, priors, analyses, and scientific claims were determined by the authors, who take full responsibility for the accuracy and integrity of the content. All AI-assisted output was verified and revised by the authors before inclusion. The tool is cited in the reference list using the APA software citation template, and the use is disclosed in the Transparency and Openness section of the manuscript.

#### **3. Records**

The APA Additional Guidance specifies that authors should document the prompts and outputs of generative AI tools, preserve them in their records, and make them available upon request, with the form and extent of disclosure to be determined in consultation with the editor. Complete

records of all interactions with the tool have been retained by the corresponding author. Because these interactions also contain private material, correspondence with co-authors, and content relating to unpublished projects, the raw transcripts are not reproduced here. They will be made available in confidence to the editor or reviewers upon request.
